

DILUSHA JAYANINDU

UNDERGRADUATE IN IT

+9476 8629 646 | dilushashashipriya@gmail.com | Dilusha Jayanindu | DilushaJS | Galle, Sri Lanka

SUMMARY

Results-driven IT undergraduate pursuing dual Bachelor's degrees in Information Technology. Passionate about software development, problem-solving, and innovation. Strong background in Python, Java, and full-stack web development. Experienced in teamwork, leadership, and project management. Enthusiastic about continuous learning, emerging technologies, and global tech advancements.

TECHNICAL SKILLS

JAVA	OOP	MySQL	HTML/CSS	C/C++
Data Structures	Python	Problem-Solving and Critical Thinking	Team Work	

EDUCATION

B.SC IN INFORMATION TECHNOLOGY	(June 2021 - July 2025 (Expected))
Rajarata University of Sri Lanka	
BACHELOR OF INFORMATION TECHNOLOGY (BIT)	(October 2023 - Present)
University of Colombo School of Computing	

VOLUNTEER EXPERIENCE

WEB DESIGN TEAM MEMBER	(2023/2024)
IEEE STUDENT BRANCH OF RAJARATA UNIVERSITY OF SRI LANKA	
AMBASSADOR	(2023/2024)
STUDPRO 7.0 IEEE YOUNG PROFESSIONALS SRI LANKA	
LOGISTIC TEAM MEMBER	(2023)
SPREAD THE WORD	

PROJECTS

IOT BASED SMART MIRROR WITH HUMAN EMOTION RECOGNITION SYSTEM

Developed a smart mirror with real-time emotion detection using CNN and OpenCV, integrating smart lighting and music recommendations based on user mood. Designed an interactive GUI using Tkinter and managed user preferences with MySQL. Utilized Raspberry Pi for processing and IoT connectivity.

TASTE TREK - FOOD RECIPES APPLICATION

Developed a mobile application for discovering, sharing, and storing food recipes. Built using Java in Android Studio, integrating SQLite for local storage and Glide for image handling. The app allows users to submit recipes, manage a shopping list, and receive relevant updates. Designed with scalability in mind, with potential Firebase integration for future real-time features.

DOOR 2 DOOR - PRODUCT DELIVERY SYSTEM

Developed a web-based delivery management system with real-time order tracking, secure payments, and efficient order management. Built using HTML, CSS, PHP, and MySQL, ensuring seamless logistics optimization for fast and reliable deliveries.

STUDENT REGISTRATION SYSTEM

Object-Oriented Programming (OOP) principles, focusing on inheritance, encapsulation, and file handling for efficient user management. Implemented role-based authentication for different user types, including Students, Academic Staff, Management, and Admins. Additionally, optimized file operations to enhance the reading and writing of user and course data, ensuring a smooth and reliable experience.
